## PROFILE

---

Dedicated and result-oriented Quality Assurance engineer with 8+ years of experience in **Automation, Functional, Mobile, and API Testing**, specializing in the **BFSI, E-commerce and Automobile domains**. Skilled in designing and executing test strategies, frameworks, and automation suites to ensure high-quality product delivery. Proven expertise in **Selenium WebDriver, Java, TestNG, UI automation**. Adept at collaborating with cross-functional teams in Agile environments to enhance product performance and reliability.

## WORK EXPERIENCE

---

**Capgemini Technologies (Client- Morgan Stanley)**    2023-SEP - PRESENT

### Senior Consultant

- **Lead, mentor, and manage** a high-performing QA team across **multiple Scrum**.
- Driving different types of testing activities including test plan, strategies and test cases design, execution, defect management based on business requirements and user story.
- Developed and maintained automation scripts using **Selenium WebDriver with Java and TestNG**.
- Built a modular and reusable test automation framework based on **Page Object Model (POM)**.
- Expertise in **design and development of complex automated test scripts**.
- **Lead the execution of automated test cases** and interpret the results to identify issues
- Performed API testing using Postman and maintain API test suites developed in REST Assured.
- Experience using **CI/CD tool Jenkins**.
- Validated end-to-end payment lifecycle including transaction authorization, settlement, and Reconciliation.
- Performed end-to-end testing of SWIFT-based financial transactions, including MTX, and MX messages.
- Designed functional and regression test cases for cross-border payment flows and bank-to-bank settlements.
- Conducting various types of test such as functional, integration, regression, smoke, sanity, end to end testing and UAT.
- Experience in writing **Feature File, BDD as a process, and in Cucumber Framework**.
- Experience in **Artificial intelligence (AI) chatbot testing**.
- Driving the **production support, release planning, preparing release note, various types of documentation, and Client demo**.
- Resource forecasting, planning and experience of using test management tool to manage testing activities, release cycle, and testing metrics.
- Part of the Capgemini India hiring panel and responsible for **training & upskilling of new joiners in QA team**.

**Capgemini Technologies (Client--Mercedes-Benz India))**

NOV-2019 - SEP-2023

### Senior Consultant

- Facilitated **sprint planning, daily stand-up, retrospective and sprint demos**.
- Familiarity with **behavior-driven development (BDD) frameworks such as Cucumber**
- Performed end-to-end testing of vehicle software update, access management, accident details, booking system features.
- Tested critical e-commerce flows: user registration, product search, add to cart, checkout, payment, order tracking, and returns.
- Performed end-to-end functional and regression testing for B2C and B2B e-commerce platforms.
- Performed API and Mobile APP testing across multiple products.
- Experience in testing **Artificial intelligence (AI) feature of the product**.
- Conducted peer reviews of test cases, and test reports to ensure quality and consistency.
- Experience as a **single QA resource for multiple product**.
- Experience in production support during the release period.
- Maintained a **strong client relationship** and trust by **excellent delivery**.
- Responsible for all testing activities includes test planning, estimation, different types of testing, test case writing, test execution, and preparing various types of documentation, Jira board management, creating confluence page.
- Communicating closely with developers and other team members to ensure that issues are understood and resolved quickly.
- Part of the technical training team to provide training on QA best practices and process in the agile environment.

**Software Engineer**

- Experienced in writing Test cases, Test scenario, test data creation, defect reporting, documentation, etc.
- Tested critical Cash management, Nostro transfer, account static, payment flows.
- Performed end-to-end functional and regression testing for **cash management** system.
- Fixing **automated test scripts** to improve efficiency, particularly for regression tests.
- Preparing Test cycle, test execution report, functional documentation of the product.
- Conducted sanity and smoke testing after every deployment.
- Executed End-to-End testing across complex workflows involving multiple upstream and downstream systems.
- Experience in Database testing.
- Created and maintained test cases, tracked defects, and participated in regression cycles.
